

Abacus for ATPL(A) and ATPL(H)

Passing the JAA Airline Transport Pilot License (ATPL) theoretical knowledge examinations for Aeroplanes or Helicopters is an important step in your aviation career.

Aerosolutions is well aware of the difficulty most future pilots have studying JAR-FCL theoretical knowledge syllabus requirements. Not only do many pilots require assistance to revise their Private/Commercial Pilot theory, they also need to have the new concepts in ATPL presented in an easy to understand format.

ABACUS ATPL is an online test preparation product to make sure that you are ready to take the JAA examinations. The ABACUS ATPL question database portrays a true reflection of questions from the JAA Central Question Bank (CQB). All questions are generated in line with the syllabus and subject modules for each subject. Abacus can emulate the precise form and scope of the JAR-FCL examination papers presented to students by a JAA National Aviation Authority.

ABACUS comes in two versions: FULL and LITE. The LITE version database contains over 6,000 questions but doesn't include all features. The FULL version includes all available features and the database contains over 24,000 questions. Both databases are regularly updated. ABACUS ATPL is much more than just a question database that generates random questions. It has very powerful tools to assist you while you are studying.

Products and competences

For many years, Aerosolutions has been developing aviation products for the training of pilots. Our training solutions allow pilots to benefit from online-based training during all phases of the training process.

With its Online Training Center, Aerosolutions offers you the ideal platform to receive training whenever and wherever you like. It is your home base for first-class aviation training using the Internet - accessible day and night from any PC.

At present, Aerosolutions offers the following comprehensive series of online products and services for all kinds of pilot training including initial, recurrent, refresher and license conversion training:

- ATPL question database
- CPL question database
- IR question database
- PPL question database
- Online course textbooks
- License conversion
- Course scheduling system
- Learning Management System

All our online training products are continuously refined and expanded in close collaboration with training organisations and aviation authorities worldwide. We ensure that our training products are always up-to-the-minute and oriented towards the latest aviation requirements.
